

IILM UNIVERSITY GREATER NOIDA

SCHOOL OF COMPUTER SCIENCE & ENGINEERING

Major Project Progress Status Report

B. Tech (CSE), VI Semester

Project ID: BT3115

Project Title: Early Feature Fusion For Intrusion Detection System

	Week I 18/02/2026	Week II 9/03/2026	Week III 30/03/2026	Week IV 15/04/2026	Week V 30/04/2026
Date of Meeting with Guide	18/02/26	10-3/26 25-3/26	25/03/26	10/04/26 15/04/26	26/04/26 28/04/26 30/04/26
Students' Names and Roll Numbers	1) Sneha 11) Sharjeel 111) Shafaq 1111) Shivangi 11111) Sanya	1) Sanya 11) Shivangi 111) Shafaq 1111) Sharjeel 11111) Sneha	1) Shivangi 11) Shafaq 111) Sanya 1111) Sneha 11111) Sharjeel	1) Shafaq 11) Sneha 111) Sanya 1111) Sharjeel 11111) Shivangi	1) Sharjeel 11) Sanya 111) Shivangi 1111) Sneha 11111) Shafaq
Name of Project Guide:	Ms. Pradeep Upadhyay	Ms. Pradeep Upadhyay	Ms. Pradeep Upadhyay	Ms. Pradeep Upadhyay	Ms. Pradeep Upadhyay
Signature of Project Guide:					
Technology Used:	Lang: Python 3.10	Libraries: Scikit-learn, Pandas, NumPy	Google Colab	Random Forest (BVM)	XGBoost, Base models
Project Status:	Lang - Python 3.10	Libraries			
Weekly project progress summary (Must fill) and Next week assigned tasks:	Literature review on traditional vs ML-based IDS. Identify limitation like high dimensional and noise	Data collection and initial preprocessing (cleaning, encoding, and normalization)	Developed 5 composite feature: Traffic intensity, Login anomaly, Data flow, Error ratio	Implemented Confidence factor (threshold) to flag and prediction. Achieved 99.99% and accuracy 95%	Conduct comparison analysis against baseline models (SVM, XGBoost)
	Next week: Finalise Dataset (NSL-KDD and CIC)	Next week: Design and implement early feature fusion logic	Next week: Train Random Forest classifier with class balancing	Next week: Finalize experimental results and evaluate generalization on CIC	Next week: Prepare final presentation and project report
